

Index insurance and farmer adoption of climate-smart agricultural practices

Jon Hellin

International Maize and Wheat Improvement Center (CIMMYT)

It has been a long journey

- Soil & water conservation technologies
- Farmer (non) adoption
- Reasons include 'risk'

And the journey continues

Drought tolerant maize varieties

- Farmers reluctant to purchase seed because of risk of crop failure
- Index insurance helps farmers manage risks & can be bundled with seed
- Insurance combined with credit: reduced risk of non payment for lenders
- Farmer invest in inputs, increasing yields & income
